PREFACE

In the first volume of the *Corpus Monumentorum Religionis Dei Menis,* I endeavored to make as complete a collection as possible of the epigraphic evidence for the cult of the god Men. In this volume I will attempt to do the same for the numismatic evidence. But there are considerable differences in the nature of the evidence, and this necessarily entails considerable differences in procedure.

Coins are different from inscriptions in that they are not each one unique, but issued in quantity. Yet, right after we say that coins are not unique, we must admit that no two ancient coins are quite identical to each other. The relatively short life of dies in antiquity; the variation in weight, flan-size, and position when the coins were originally struck, together with the accidents of preservation which have befallen the coins over a period of almost two thousand years, have all resulted in individual uniqueness existing within a structure of mass-issue.

To cope with this situation in composing a corpus of the numismatic evidence for Men, remembering that our prime concern is to be historians of religion, rather than numismatists, certain arbitrary decisions are necessary. If I endeavoured to list every known specimen of every known coin, I doubt if I could ever complete the work satisfactorily. Therefore I have chosen to abide by the rather subjective concept of "issues," lumping together coins that differ only slightly in weight, size, style of representation, or inscription. This last, particularly, may be real or only apparent, as accidents of preservation easily result in the inscription appearing to be different even in two examples of a coin struck with the same die. I am not attempting a complete study of the sizes and weights of all known copies of the coins treated here. The size can be easily judged from the illustrations provided. In addition, wherever possible, I give the weight of at least one typical example of each coin. Weights of Greek imperial coins are, of course, highly variable, and the figure is merely given in order to present a rough indication of the denomination of the coin we are dealing with. In the case of a coin with an exceptional weight-range and in some other cases, I give the highest and lowest weights that I know of.

Coins, too, are an even greater bibliographical impossibility than are inscriptions. There are two particular problem areas: a) the older publications, prior to ca. 1850 (even the old standard, Mionnet, is very frustrating to use), and b) the sales-catalogues.

a) The older publications are without photographic documentation, hard to get at in libraries, and often quite inaccurate. To track down every reference to them would be immensely time-consuming, and yield relatively trivial results. Consequently I have not made any attempt to review consistently all references in Drexler's article *s.v. Men* in Roschers *Lexikon.* I include in the bibliographies only titles which I have had the opportunity to inspect for myself, and which I feel contribute valuable information to the study of the particular coin. The reader interested in the often inaccurate reporting of Men-coins in older publications is referred to Drexler's article, which, by and large, gives a reliable survey of the scholarship preceding its own time.

b) The sales-catalogues too pose a problem. Not only are they hard to get at in libraries, but they vary immensely in quality, from the productions of such firms as Münzen und Medaillen, Basel, reasonably well-researched, and excellently illustrated, to lists which give the user only the sketchiest idea of what coin exactly is for sale. Faced with this situation, I include references to sales catalogues only when they are the only or among the few references to a given coin. Even at that, I include references only to the more reliable catalogues.

It is just about impossible, even with the best intentions of completeness, to be sure that one has covered all the relevant bibliography on a given item. Therefore when I write "Bibliography: none" in the following pages, this of course means that there is no reliable bibliography of the past 100 years or so which has come to my attention. I welcome readers drawing my attention to bibliographical and other omissions.

As to the geographical order followed in this catalogue, it is according to the areas of Asia Minor into which museum catalogues are usually divided, and within each of those, alphabetically.

Specifically, the order is Pontus, Paphlagonia, Bithynia, Aeolis, Ionia, Lydia, Caria, Phrygia, Pisidia, Galatia, and Syria.

This preface would not be complete without a list of those who have helped make it possible. My thanks for their cooperation go to the National Numismatic Museum of Athens, and particularly Mrs. Oikonomidou; the Istanbul Arkeoloji Müzeleri and Nekriman Olcay; the Staatliche Münzsammlung, Munich, and Dr. Bruno Overbeck; the Kunsthistorisches Museum, Vienna, and Dr. G. Dembsky; the Bibliothèque Nationale, Paris, and Mme. Nicolet; the Staatliche Museen, East Berlin, and Herr und Frau Schultz; the British Museum, London, and Mr. Martin Price; Mr. Simon Bendall of Baldwin's, London; Herr Hans von Aulock, Istanbul; Mr. J. Mossop, Holbeach, Spalding, Lincolnshire, England; the Hunterian Collection, Glasgow; the Magyar Nemzeti Muzeum, Budapest; the State Hermitage, Leningrad; the American Numismatic Society New York, and particularly Dr. Margaret Thomson; the Museum of Fine Arts, Boston; to the Museum of Art and Archaeology of the University of Missouri, Columbia; to Mr. Hans-Jörg Bloesch, Winterthur; Dr. R. Göbl, Vienna; the staff of E. J. Brill; and to many others too numerous to mention who have helped with advice and information.

For permission to reproduce photographs I should thank the Royal Collection of Coins and Medals, Copenhagen; the Staatliche Museen, Preussischer Kulturbesitz; the Deutsches Archäologisches Institut, Abteiling Istanbul; the Indiana University Art Museum, Bloomington; Manchester University Press and the Österreichische Akademie der Wissenschaften.

Last but not least, particular thanks go to my student, Mr. Carl Berkowitz, who with his indefatigable gathering of material for me spared me the necessity of trips to such places as Brussels, Adana, and Jerusalem; and to Ann Wright, our secretary here in Columbia, for her help as a typist. Thanks for financial support go to the American Philosophical Society, the American Council of Learned Societies, the Research Council of the University of Missouri, and the University of Missouri-Columbia Alumni Development Fund.

Remarks: I have given above the description of the coin first made by Milne, and supported by Professor C. M. Kraay, but I remain unhappy about it. The size and style of the coin seem out of place in the Severan period. Particularly striking is the resemblance of the rev. bust of Men to the early issues of Bageis.

Regling, *Nysa*, p. 85. no. 136
Lane, II, p. 20, note 14

Weight: unavailable
Illustrated example: none
Remarks: This coin is listed by Regling with hesitation from old and unreliable sources, and should perhaps be excluded.

Weight: 22.52 gr.
Illustrated example: Oxford

Remarks: There must have been some specific occasion for the unusual representation of this unique coin, about which both Regling and Drexler entertained doubts.

Nysa 30 Plate XI

Obv.: Busts of Philip I and Philip II, facing each other
Inscription: largely illegible
Rev.: Men (?) standing in hexastyle temple. Coin very badly worn.

Remarks: The last three coins, together with BMC Phrygia, p. 271, no. 3, and Pl. XXXIII, 2 (a coin with obv. Hadrian, rev. inscription: ’Απελλᾶς ’Αθηναγόρου ἀνέθηκε ‘Υδρηλειτῶν) present a

rather unusual situation, of which the following may be the correct explanation: Our Hydrela 2 and Hydrela 3 are stylistically very similar, therefore both seem to date from the time of Augustus. No. 2 bears the magistrate's name Apellas. He seems to have had a son, Athenagoras, and a grandson, Apellas (II). Apellas II, in the reign of Nero, not only was the magistrate who issued money, but repeats his grandfather's type. He in turn had a son, Athenagoras (II), and a grandson, Apellas (III). Apellas III in the reign of Hadrian was in turn magistrate in charge of the money, but did not choose to use the ancestral type. The periods of time elapsed between grandfathers and grandsons seem about right.

Remarks: For a discussion of the obviously female-looking Men (Selene?) on this and the following coin, see L. Robert, *Centennial Publication of the American Numismatic Society*, New York, 1958, p. 578. Robert is of the opinion that the divinity repre-

sented is Selene. If so, she borrows the attributes of Men of Antioch in Pisidia. For a possible reverse example, see the biga-type of Temenothyrae, where Men borrows Selene's iconography.

Krzyzanowska, *MC,* Pl. XIX-XX, Table 18, and p. 160-62, Av. XXXI, XXXIV-XXXVI, XXXIX, rev. 37-40, 49-56, 60

Weight: 21.33 gr.-31.38 gr. (examples known to Krzyzanowska)

Illustrated example: Aulock

Remarks: This is an abundant issue of coins, probably the most abundant of all coins with representation of Men. It appears in sales-catalogues frequently, and if they were to be listed, the bibliography would be increased immeasurably. Krzyzanowska views these large issues of the Severan dynasty at Antioch as replacing the smaller issues after a monetary reform.

Antioch 35 Plate XXXIII

Obv.: Bust of Septimius Severus, l., laureate

Remarks: On his copy Imhoof-Blumer reads XVIIII, but on the Vienna copy Krzyzanowska reads IIII. If Imhoof is right (something which I have been unable to check), then it destroys all of Krzyzanowska's dating.

Remarks: What I have obviously done with these last coins is to separate those which portray the emperor r. from those which portray him l., and then to single out some which have particularly unusual reverse inscriptions.

Remarks: On the basis of the representation (Men holding both patera and pine-cone) this coin has generally been attributed to Ancyra or to the Koinon of the Galatians. The puzzling reverse inscription has been held to indicate that the emperor is being identified with Men. The present author does not feel that either assumption is necessarily justified. Cf. the provincial issues of Lycia under Claudius, on which the emperor's titles are continued on the rev., with representation of various divinities.

ADDENDA AND CORRIGENDA TO VOLUME I*

A. CORRIGENDA

In spite of my best efforts, there remained a number of typographical errors even in the final version of the first volume of *Corpus Monumentorum Religionis Dei Menis*. Most of these are minor, and will easily be corrected by the reader; but I would like here to list those which are of more consequence, and may cause trouble for the reader:

---

* At Professor Vermaseren's suggestion I address myself here to the rather annoying review of vol. I by Jean Pouilloux, which appeared, *REA*, LXXIV, 1972, pp. 367-368. Some of the detailed criticisms of my book are simply wrong. For instance, I am blamed for having given line drawings of items 7, 21, 51, 77, 133, 171, 175, and 177, instead of photographs, when the monuments are still accessible. In fact, nos. 51, 77, 133, and 171, are to the best of my knowledge not accessible. I have in my possession a photograph of no. 21, but the letters are so faint that it would have lent no aid to anyone, so gave the line-drawing by preference. That leaves the criticism valid only for nos. 7, 175, and 177, at most.

Secondly, M. Pouilloux faults my book for not mentioning the monument published by Miss C. H. E. Haspels, on p. 167 of her generally very informative book, *The Highlands of Phrygia*. In point of fact, this monument (which, incidentally, M. Pouilloux seems to conflate with another monument published by Miss Haspels on p. 200 of the same work) neither contains the name of Men nor conforms to his iconography. Miss Haspels is almost certainly wrong in her attribution, and M. Pouilloux should have recognized it.

After this display, it is disconcerting in the next paragraph to find myself faulted for lack of "efforts critiques." M. Pouilloux is unhappy that I published Hicks' text of no. 15, which he finds incomprehensible. Now the end of no. 15 is indeed puzzling, but it seems to me irresponsible to try to wish it out of existence just because one does not understand it. By that process, much of the evidence for this cult could be wished out of existence.

Mostly, however, M. Pouilloux' unhappiness rests on the fact that I did not undertake a full interpretation of the monuments along with their presentation in volume I. Indeed, except for a few brief remarks, mostly original with myself, I have deliberately postponed discussion and interpretation for volume III, where I will handle it as satisfactorily as I am able. I can only counsel patience.

To give the devil his due, there are a couple of valid remarks in Pouilloux' review. Firstly, it would have been more helpful to the reader had I numbered the lines of the inscriptions. Secondly, I have been inconsistent in whether or not I capitalized incomprehensible portions of inscriptions, following too much the example of my sources, themselves inconsistent. I will try to do better on both scores in the future.

B. ADDENDA TO ITEMS INCLUDED IN THE FIRST VOLUME OF THE *CORPUS*

Here I propose to list what seems to me the most significant bibliographical references to items listed in the *Corpus*-references which either have appeared since its publication, or were overlooked by or unavailable to me at the time I wrote it. I do not profess to be complete. Those references which concern themselves only in passing or in general terms with the material will be mentioned in the volume of conclusions, if they have anything to contribute to the discussion. Only fairly specific items are treated here.

No. 2 is now in the Museum of Fine Arts, Boston.

No. 13 is published by F. Sokolowski, *Lois Sacrées des Cités Grecques*, Paris, 1969, no. 55 with an interesting commentary and many bibliographical references. (I am indebted for this reference to the valuable review of my first volume by Giovanni Geraci in *Rivista Storica dell' Antichità*, 1972, pp. 275-279).

No. 16 is published by L. Vidman, *Sylloge inscriptionium religionis Isiacae et Sarapiacae* (Berlin, 1969), no. 176, and discussed, *Isis und Sarapis bei den Griechen und Römern* (Berlin, 1970) pp. 66-67.

In no. 23, Geraci suggests the filling of the lacuna in the last line with [Flavio]. He also suggests that in the whole set of Latin inscriptions the abbreviation V C be taken as V(ir) C(larissimus) rather than V(ir) C(onsularis). I am very glad to have these suggestions, as I am not at home in late Latin epigraphy.

No. 50 is discussed by J. L. Robert, *REG*, 84, 1971, p. 498.

No. 53 is published by F. Sokolowski, *Lois Sacrées de l'Asie Mineure*, Paris, 1955, no. 19, with interesting commentary, but with the date off by one year.

No. 75 is discussed by H. W. Pleket, *Mnemosyne*, 1970, p. 192-195 with particular reference to the word σημαῖα.

No. 111 is discussed by Mara Bonfioli and Silvio Panciera in *Pontificia Accademia Romana di Archeologia, Rendiconti*, 44, 1971-72, p. 199. They are concerned with the possibility of Christianity in the household of the descendentsa of Sergius Paulus, the proconsul of Cyprus who listened to St. Paul preaching, according to *Acts*, 13, 12. Their conclusions are basically negative.

No. 163 not illustrated in vol. I, is illustrated by B. Levick, *JHS*, 91, 1971, Pl. XI.

No. 195 is discussed by W. M. Ramsay, *The Athenaeum*, July 13, 1912, pp. 45-46. In this he makes clear that our nos. 190 and 195b are actually identical, 195b being his reinterpretation of 190.

No. 255 is discussed by B. Levick, *JHS*, 91, 1971, 80 ff.

No. 264 is discussed by Ramsay, *The Athenaeum*, Sept. 7, 1912, pp. 252-3. Here he makes clear that this piece, and presumably also nos. 260-63, were found in 1912 in the area of the sanctuary.

Nos. 283 and 290 are discussed by B. Levick and A. M. Davis in *Classical Review*, 1971, pp. 162-166, as to the word κοπτοπώλης or "confectioner". The word σουμμαρούδης is interpreted as Latin *summa rudis*, "fencing master".

C. MATERIAL NOT LISTED IN THE FIRST VOLUME OF THE *CORPUS*

I. *New Material*

Tosuntaşı

(14 km. SSW of Bozkır, Turkey)

A 5. A bossed rectangular block of limestone found by T. Mitford in the local cemetery on August 13 or 14, 1966.

Dimensions: Height 49 cm., width 1.05 m., thickness 65 cm., letters 3.5 to 3 cm.

Bibliography: G. E. Bean and T. B. Mitford, *Journeys in Rough Cilicia, 1964-1968* (Österreichische Akademie der Wissenschaften, Phil.-Hist. Klasse, Denkschriften, 102, 1970), p. 118, no. 105 and Photograph 90.

The stone bears the following inscription:

[Ὁ]ρ̣κίσ̣ζω Μῆνα καταχθόνιον καὶ οὐράνιον
vac. μηθένα δόλον τῷ ἔργῳ (sc. γενέσθαι)

Comana Cappadociae: Şar, Turkey

A 6. Round altar of pink marble, decorated with scrolls on the sides.

Dimensions: Height 35 mm., diameter 18 mm, letters 2 mm.

Bibliography: R. F. Harper, *Anatolian Studies,* XXII, 1972, p. 225, no. 3, 10 and fig. 1, 2.

The stone bears the following inscription:

Κυρίῳ Μηνὶ Ἡλιόδωρος
Δημητρίου νεωκόρος
ὑπὲ̣ρ τῆς Διοδώρου
Γορδίου τοῦ ἱερέως
σωτηρίας

These two inscriptions are interesting in that they show the presence of the Men-cult further to the South-East than previously attested.

Kalburcu

Vicinity of *Nicomedeia*: Izmit, Turkey

A 7. Profiled basis (altar?) of limestone, known since 1974.

Dimensions: Height 1.16 m.; width 39 cm.; thickness 39 cm.; letters 5 cm.

Bibliography: S. Şahin, *Neufunde von Antiken Inscriften in Nikomedeia (Izmit) und in der Umgebung der Stadt* (Dissertation, Münster), 1974, p. 121, no. 66.

The stone bears the following inscription:

’Αγαθῇ τύχῃ.
Θεῷ Μηνὶ
Δωλανῷ
δῶρον
Κρέττιος
Μαρκιανός.

The epithet Δωλανός is new, and according to Şahin's indication, no. 35 of his collection (I have not yet been able to consult it in full), the Δωλανοί are a group of people known from two sarcophagus inscriptions of Nicomedeia.

The inscription is valuable in attesting Men-worship from an area where it had not previously been attested.

Şahin, *op. cit.*, nos. 67 and 68 also may be connected with Men-cult, as they bear a crescent, and no. 72 has a fragmentary inscription in which it may be possible to restore Men's name.

A 8. A stele with lugged bottom, now in museum of Izmit, but reportedly from area of Manisa.

Dimensions: unavailable.

Bibliography: To be published in a forthcoming article by Elmar Schwertheim in *Istanbuler Mitteilungen.*

Under the top moulding, the stone bears a relief field, showing, to viewer's left, Men standing with pine-cone. His l. hand is upraised to hold a staff, which was apparently indicated either in perishable material or in paint. To viewer's right, a female divinity standing, with a polos on her head, a drum or tambourine in her r. hand, and a round object in her l. Under the relief field there is the following inscription:

Κατ’ ἐπίπνοιαν Διὸς Κιλ-
λαμενηνοῦ ’Αρχελάου
κώμη Μηνὸς τέκουσαν 161-2 A.D.
καὶ Μῆναν Τύραννον καθι-
έρωσαν ἔτους σμς′ μη(νὸς)
Πανήμου.

I reserve further discussion of this interesting piece until after Dr. Schwertheim's article has appeared.

A 9. *Serivada*?: Çiftlik, near Kizil Ören, Turkey (North of Açil Göl, ancient *Anaua Limne*)

Block of marble, built into wall of local tea-house. First seen by Kunibert Bering and Dieter Salzmann in June/July 1971.

Dimensions: Height 35.5 cm., width 32.5 cm., thickness less than 30 cm.

Bibliography: K. Bering and D. Salzmann, *Zeitschrift für Papyrologie und Epigraphik*, XIV, 1974, pp. 259-260.

The stone, which apparently served as a statue-base, bears the following inscription:

’Απολλώνιος Με-
νελάου τοῦ ἱερέος 100-101 A.D.
καὶ ’Αμία ἡ γυνὴ αὐ-
τοῦ καὶ Μενέλαος
ὁ υἱὸς αὐτοῦ τῷ δή-
μῳ τῷ Σεριουαδέ-
ω̣ν παρὰ ἑαυτῶν
ἀ̣νέθηκαν Μῆνα
Π̣ατάλαον, ἔτους
ρπε′, Μ)(Γ

Professor Louis Robert has informed me by letter that he knows of an inscription from Phrygia that confirms the epigraphical attestation of Καμαρείτης as an epithet for Men, otherwise known only from coins of Nysa and restored in no. 56. Cf. *Laodicée du Lycos, Le Nymphée*, Quebec and Paris, 1969, p. 297, note 5.

Mr. Thomas Drew-Bear informs me that he knows of a letter of Eumenes II, into which a mention of a temple of Men has been restored. This should be very interesting when it is properly published. I have been shown in the storerooms of the Istanbul Archaeological Museum a marble bust and a terracotta of Men, as well as an altar portraying Men on one side. It is to be hoped that all these items will eventually be published.

II. *Old Material*

From the first volume of the Corpus I excluded (although I perhaps should have mentioned them among the Dubia) the following inscriptions, because the presence of Attis Menotyrannus in them is attested only from old and unreliable copies, in the first two cases, and by dint of heavy restoration in the third. Now, however, further study of the historical context of these inscriptions has convinced me that I should at least make mention of them here. All are from Rome.

AD 2. Stone of uncertain description and dimensions. Presumably copied by Cyriacus of Ancona (ca. 1391-1457). Now lost.

Partial bibliography: *CIL*, VI, 508; Dessau, *ILS*, 4146; R. Duthoy, *The Taurobolium*, Leiden, 1969, p. 17, no. 21; G. S. R. Thomas, *Revue Belge*, 49, 1971, p. 55 ff.

The stone bears the following inscription:

Potentiss(imis) Diis [M(atri) D(eum) M(agnae) I(daeae) et At]
ti Menotyranno . . . .
Serapias h(onesta) f(emina) sacr(ata) [Deum]

Maias Cerealibus D(ominis) N(ostris)
Constantino Max(imo) Aug(usto) V et
Licinio Iun(iore) Caes(are) co(n)s(ulibu)s.

This inscription is dated April 19, 319 A.D., and if genuine is far the earliest in this series of inscriptions.

AD 3. A large altar described as follows by Duthoy from the *CIL*: "Magna ara mutilata. In quattuor angulis superioribus tauri caesi iacent; in sinistro latere aries ad pinum, in qua tympanum est; a dextris ad pinum taurus, ex qua pedum, fistulae, mitra pendent; a tergo faces lucentes transversae decussatim." Apparently first copied by Martin Smetius, active 1545-1551, but the fullest copy is by the notorious falsifier, Ligorius. Now lost. Dimensions unknown.

The stone bears the following inscription:

AD 4. An altar described by Duthoy from the CIL as follows: "Ara rudis ac male habita; superne arietes quinque, singuli scilicet in singulis angulis atque unus in fronte mactati iacent; in latere dextro stat aries sub pinu; a qua tympanum, fitulae compactae, et crotala dependent; in sinistro taurus stat sub altera pinu, a qua pedum et singulares fistulae duae suspensae sunt; a tergo sunt faces transversae." Apparently first copied by Martin Smetius. Now lost.

Dimensions unknown.

The exact relationship of the Lycaonian sepulchral inscriptions to Men-cult is problematical, and they, like the Attis Menotyrannus inscriptions, represent a puzzling peripheral area. The reading and interpretation of our no. 155 seemed assured by the observation of H. Swoboda et al., *Denkmäler aus Lykaonien, Pamphylien und Isaurien* (Prague, 1935), p. 18 until W. M. Calder's reinterpretation appeared in *MAMA*, VIII, no. 234a. He wishes to read the following for lines 7-8, and says that there is no room for other letters than those preserved at the end of line 7:

ἐνορκῶ τρὶς θ′
Μῆνας ἀνεπιλύτους

He bases his interpretation on two other inscriptions. Although I excluded them from CMRDM I, I have decided to include them here among the Addenda to the Dubia, not so much because I doubt Calder's readings, although not all letters appear clearly on the photograph, but because I do question whether these inscriptions, on Calder's interpretation at any rate, have anything meaningful to do with the god Men.

Savatra: Yali Banat, Turkey

AD 5. Five fragments of a sarcophagus lid, first seen by H. S. Cronin in 1901.

Dimensions: Height 59 cm., length 1.96 m., depth 93 cm.

Bibliography: H. S. Cronin, *JHS*, XXII, 1902, p. 373, no. 127; W. M. Calder, *MAMA*, VIII, p. 42, no. 234; L. Robert, *Hellenica*, XIII, 1965, p. 38 and p. 242.

Under the effigy of the deceased, on the right side of the sarcophagus lid, together with a decoration of crescents alternately upside-down and right-side-up, there is the following inscription:

(I follow Calder's restoration, with a few additional suggestions of my own).

Κ. Ἰουλίττῃ γυναικὶ παναρέτῳ [. . . .φιλ]άνδρῳ [. . . .]ηι Στρατονείκη ἡ̣ μήτηρ αὐτῆς καὶ Κ. Κέλ[σος . . . .]τ[. . . .] καὶ ἑαυτῷ ὁ Κέλσος μόνοις τὴν λάρνακα μ[νήμης ἕνεκεν. Ἐνορκοῦμεν δὲ τ]ρὶς ἐννέα Μῆνας καταχθονίους μηδένα μ[ετὰ ἡμᾶς ἐπεισενεχθῆναι εἰ μὴ. . . .] ανδρα.

Area of ancient *Perta*(?): Zengicek, Turkey

AD 6. Stele, broken at top. Known since 1934.

Dimensions: Height 92 cm.: width 41 cm.

Bibliography: W. M. Calder, MAMA, VIII, p. 42, no. 234b.

The stone bears the following inscription:

[. . . . . . . ὅς]
[δ' ἄν ἀδικήσῃ]
[τὴν στήλην]
ταύτην ἕ[ξει]
κεκολωμέν[ους]
Μῆνας αἰνέα

Calder did not copy the inscription himself, nor are we informed who did, except that the copier indicates room for only two letters lost at the end of the next-to-last line. That fact would shed considerable doubt on the restoration, as Calder admits.

AD 7. Finally the following was omitted from *CMRDM*, I, in what now seems to me to be excessive distrust of W. M. Ramsay, although he is a very easy scholar to distrust excessively:

A roughly-carved stone chair, found in 1912 in a structure adjoining the sanctuary of Men Askaenos above Pisidian Antioch. Dimensions unavailable.

Bibliography: W. M. Ramsay, *ABSA*, XVIII, 1911-12, p. 49; Lane I, pp. 41-42.

Ramsay read the following inscription on the chair, the first three lines being on the back, the last two below the seat:

Μηνὶ εὐχὴν
Μενέλαος
Ἀττάου
τοῦ καὶ
Κάρπου

As I stated, Lane I, p. 42, note 150, this inscription was no longer to be read in such detail in 1961, but all that could be made out was Μενε | αττα | Κάρπου. For dedications of furniture to Men, see no. 255; for the name Κάρπος, no. 253. (I still see no reason for reconsidering my rejection as having nothing demonstrable to do with Men-cult of the other inscription discussed in the same note, Ramsay, *JHS*, L, 1930, p. 274-75.)

* A question mark is added after the name of Accilæum, because the remarks of Konrad Kraft, Das System der Kaiserzeitlichen Münzprägung in Kleinasien, pp. 97-98, shed considerable doubt on the correctness of the traditional location. It is perhaps rather to be located in the vicinity of Trapezopolis and Aphrodisias.

Remarks: The traditional location of *Sibidunda* is shown on the map, but it is more probably to be found at Zivint, between *Olbasa* and *Ariassus*. See G. E. Bean, *Anatolian Studies*, 1960, pp. 68-69.
